

# CAUTIONARY NOTES

## **Forward-looking Statements**

This website includes certain forward-looking statements about future events and/or financial results which are forward-looking in nature and subject to risks and uncertainties. Forward-looking statements include without limitation, statements regarding the company's plan, goals or objectives and future mineral projects, potential mineralization, resources and reserves, exploration results and future plans and objectives of Hudson Resources. Forward-looking statements can generally be identified by the use of forward looking terminology such as "may", "will", "expect", "intend", "estimate", "anticipate", "believe", or "continue" or the negative thereof or variations thereon or similar terminology. There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from expectations include risks associated with mining generally and pre-development stage projects in particular. Potential investors should conduct their own investigations as to the suitability of investing in securities of Hudson Resources.

## **Cautionary Note Regarding Mineral Reserves and Mineral Resources**

Readers should refer to the current Technical Report of Hudson and other continuous disclosure documents filed by Hudson available on SEDAR at [www.sedar.com](http://www.sedar.com), for further information on Mineral Resources, which is subject to the qualifications and notes set forth therein as well as for additional information relating to Hudson more generally. Mineral Resources which are not Mineral Reserves, do not have demonstrated economic viability.

## **Cautionary Note to U.S. Investors Concerning Estimates of Measured, Indicated and Inferred Resources**

This website uses the term "Inferred" Mineral Resources. U.S. investors are advised that while such terms are recognized and required by Canadian regulations, the Securities and Exchange Commission does not recognize them. "Inferred Resources" have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an inferred resource will ever be upgraded to a higher category. Under Canadian rules, estimates of Inferred Resources may not form the basis of feasibility or other economic studies. U.S. investors are also cautioned not to assume that all or any part of an Inferred Mineral Resource exists, or is economically or legally mineable.
